Martin,

The start-up is typical – long days, many aspects of the plan were aborted and we’ve adjusted. The flows are at 500 gpm this year, which is the highest observed to-date, 300 is normal. This changed our planned diversion piping option – which in the end may be better anyway – we’ll see. All in all though, we’re on schedule – underground work to clean out the mine should begin a couple days or so. Worked through the weekend to be ready for the underground crew today. I’ll send some photos soon and an update.

Steve

Spoke with Mayor Tookey and she was pleased that we will be trying to get her what she needs by 7/23. I let her know we were working on it now and that we would try and deliver. If we can't get all of what she needs it to her by thursday I told her I would let her know. I also assured her that if we go forward we could work during the shoulder season when the town wasn't so busy.

Thanks Steve. I was literally in the process of writing an email to everyone on this same topic.

Attorney Client/Ex. 5

I'll follow-up with Liz on Monday.

Thanks,

Steve

Subject: Silverton Soils - Proposed Sample Summary

Hello folks,

This is just a confirmation of the plan to have Joyel work with Liz and Susan to craft a succinct summary of the sampling program that EPA could implement on Town Property. (This not the residential sampling program.) Based on my conversation with the Mayor, I have highlighted the items she believes are most critical to have.

Attorney Client/Ex. 5

I will attempt to get a date by which the town would like to have something and any clarification on the content they hope to see. Depending on when the three of you can meet, I may be able to join for some part of the discussion by phone. However, I am likely not available much after that for several days. Our operations at the R n B are full on as of Monday. (Liz and I were planning to talk at 0800 on Monday, but need to change that because I learned the underground mining crew will be onsite first thing Monday AM.)

Currently (and tentatively), the Town Board may meet on Monday, July 27th and they would like to have something available to provide the board by Thursday, July 23rd. This may change to a later date, and I will let you know early next week.

Attorney Client/Ex. 5

Let me know when you plan to meet (Joyel you can work that out with Susan and Liz), and if you want to talk with me I'll try to join. (Susan indicated availability all Monday.)

Thank you for your assistance on this.

Steve
